PROFILE

For the last 6+ years I've been working together with spectacular teams, developing and launching web solutions for both small and large companies, such as software houses and fintechs.

I am experienced writing and maintaining frontend codebases, prioritizing semantic markup, responsive and performant screens, tested and documented implementations. I have also strong interest in backend development and infrastructure built on top of Docker, Phoenix, Django, Rails and Express, including relational and NoSQL databases.

PROFESSIONAL EXPERIENCE

Mobile Developer at SoftMakers

Feb 2021 - Apr 2021

The mobile application I had collaborated developing was focused on facilitate daily processes and classrooms necessities for medicine teachers, monitors and students. It was built using the React Native ecosystem, Node.js and GCP.

Frontend Developer at Magnetis Investimentos

Jan 2017 - Sep 2018

There I had the opportunity to collaborate developing great investment advisor applications, including user dashboards, onboarding pages and external services integrations. Part of the work was to migrate specific systems from a monolithic codebase to microservices, considering product metrics and scalability.

Frontend Developer at Crafters Software Studio

Jul 2016 - Sep 2016

At Crafters I had integrated an agile team, developing frontend pages that was backed mostly by Ruby on Rails applications, for both national and international startups. Despite the short time it was a valuable experience.

Web Developer at Teles & Medeiros Representações

Jan 2014 - Dec 2015

The challenge here was to create an online magazine of planned furniture, integrated with an internal CMS to facilitate the communication between store consultants and brand representatives and suppliers.
